This issue is dedicated to Jim Hire, W8ZET, -- (1929-2002)

SPECIAL NOTE FROM THE EDITOR AND NODXA CLUB PRESIDENT -- Tedd,

KB8NW: It is with great sorrow to report that the members of the Northern Ohio DX Association have lost a dear friend and member. **Jim Hire, W8ZET**, became a "Silent Key" early Thursday morning due to some complications after an operation on Monday. Jim, a club member since the late 1970's, really enjoyed promoting NODXA and DXing. Through DXing, Jim has made many friends that cover a wide range -- from all over Ohio and many foreign DXers in Europe. Jim worked 370 DXCC entities. Many DXers/Contesters have probably met Jim at the Dayton HamVention. For over the last six years, Jim has invited, hosted and provided a hospitality suite for NODXA at the Dayton HamVention. During this yearly gathering of DXers, Jim enjoyed meeting all his friends from all over the world. Through his wonderful hospitality, world-wide friendship and club promotions, NODXA gave Jim (and his wife) a honorary "NODXA Lifetime Membership". For me, Jim's sparkling smile and presence at club meetings and seeing his joy at the hospitality suite will be dearly missed. On behalf of NODXA, I would like to send out the club's deepest sympathy to his wife, family and many friends. Please visit the "Dayton 2000 Gallery" Web page to see a picture of Jim (and me) at: <http://hamgallery.com/dayton2002/d0249.htm>

GRID SQUARE TO BE ACTIVATED. The North Side Contesters Club is announcing an expedition to activate grid square EN-67 during the period **September 21-23rd**. This will be a field day type operation from **Brockway Mountain** in **Keweenaw County, Michigan**, with coverage on all HF bands, plus 6 meters, 20 meters and 70 cm. The QSL Manager will be NV8V. Look for the VHF/UHF operation on the SSB calling frequencies, or 10 kHz up if in use. The HF station will operate about 5 kHz above the IOTA frequencies, plus or minus QRM. The operators will be: NV8V, N9RK, W8UFO, AB8KO, KA8FFM and N9SSN.

IOTA CONTEST 2002 (1200z July 27th to 1200z July 28th). Don Field, G3XTT, IOTA Contest Manager, reports: "Just a little over a couple of weeks now until this year's IOTA Contest. And, judging by the announcements in the bulletins and on the reflectors, there will be a huge amount of island activity; plenty of multipliers for the serious contesters, plenty of IOTA counters for the IOTA enthusiasts. It looks like the best IOTA Contest yet! Most of you will have seen the write-up and results from last year (if not, they are, of course, on the RSGB HF Committee Web page - <http://www.rsgbhfcc.org>). The main rule changes this year are in the rules regarding island DXpeditions, the introduction of a World multi-op category (previously, only island stations could participate multi-op) and the introduction of a 100-watt option for all entrants. When you submit your logs, do please ensure that the cover sheet makes clear which section and category you are entering (especially, make clear whether 12- or 24-hour, whether 100-watt or high-power and whether CW, SSB or multimode. Otherwise you will automatically be classified as 24-hour and/or multimode and/or high-power). Advice on how to configure the most popular logging programs for use in the contest has been posted on the Contests Committee Web page (see above). There were particular problems last year with entrants who had used CT. Under some configurations, the .LOG file did not contain the received serial number (whereas the .ALL file did). Please check that your log contains all the necessary information. Electronic logs are preferred, ideally to the new address of iota.logs@rsgbhfcc.org . Even if you only make a few QSOs, please send a log - all logs are entered in the master database for checking purposes. We hope to improve the collection of logs this year, and I am especially grateful to Trey N5KO for working with us on this, as he has previously done for both CQ and ARRL....." 73 Don Field, G3XTT: g3xtt@lineone.net (also iotacontest@rsgbhfcc.org)

Use the VOICE or FAX answering machine at 440-237-8208 which shares the same phone line as BARF-80 BBS using a data/fax/phone switch. To access:
1) Dial Number. 2) Wait for first ring (the second ring should be a false ring from the fax/data switch box) and then dial four quick ones ("1111"). (NOTE: Some FAX machines that send single "BEEPS" every second will not have to do this step.) 3) The phone will pick up and after the "BEEP" leave your voice message or FAX.
